PROFILE

I create beautiful, functional mobile applications that solve real problems | **1.5+ years** building Flutter apps | Published **2 packages** on pub.dev | Multiple shipped **production apps** | Strong focus on writing simple, clean, readable, and easy-to-understand code.

SKILLS

• Flutter • Dart • OOP • SOLID • Riverpod • Provider • Clean Architecture • Hive • Firebase • Supabase • REST APIs
• UI/UX (Figma) • Localization • Flutter Animations • Git / GitHub • VS Code • Package Publishing

EXPERIENCE

Flutter Developer | Freelance/Personal Projects

01/ 2024 - Present

- Built and deployed **10+ production Flutter apps** solving real problems
- Published **2 packages** on pub.dev
- Contributed to client projects: bug fixes, feature development, UI improvements

Open-Source Contributor | Stack Overflow [StackOverflow](https://stackoverflow.com)

04/2024 – Present

- Solved **48+ technical questions** for Flutter developers worldwide
- Built **+630 reputation** through consistent, high-quality answers
- Published **15+ open-source solutions** for complex Flutter challenges

PROJECTS

Knook – Islamic Companion App ([landing page](#) also built with flutter)

07/2025 – 10/2025

- All-in-one Islamic **super-app** with full Quran with 8 tafaseer, prayer times, 40 MB searchable book library, custom search, **offline-first architecture**, implementing custom **search algorithms** for content discovery.
- **Tech:** Flutter, Riverpod, Hive, Firebase, REST APIs, Optimization.

AutoLangField – Smart Multilingual Text Field ([pub.dev](#) | [GitHub](#))

- Published a **package** that detects input language in real-time (**80+ languages**) and auto-applies RTL/LTR styling and properties using **Regex patterns**, enables **multilingual** input without manual config
- **Tech:** Flutter, Regex, Text processing | **Impact:** Simplified multilingual development

MorphSwitch – Toggle Switches and Sliders ([pub.dev](#) | [GitHub](#))

- Built customizable **toggle switches** with **animations**, achieving **TOTAL 500+ downloads** across apps.
- **Tech:** Flutter, Custom Animations, Implicit animation | **Impact:** Production-ready UI component

TastyBites – Food Ordering App ([GitHub](#))

- Built food delivery app with **real-time cart management** with **Firestore**, integrating Firebase auth, providing seamless dine-in and delivery ordering experience.
- **Tech:** Flutter, Firebase, Provider, PDF generation | **Impact:** Production-ready food ordering solution

MoneyWise – Finance Tracker ([about project](#))

- **Created** an expense, income & saving management app with category-based tracking, advanced date search, and interactive data visualizations **to helps** users understand and improve spending habits
- **Tech:** Flutter, Hive, Provider, fl_chart, flutter_localizations

FrenchMate – Language Learning App ([about project](#))

- Built comprehensive **French learning** platform with **2,500+ categorized words** and **grammar** tools, implementing TTS pronunciation and offline storage, making language learning accessible and interactive.
- **Tech:** Flutter, Hive, Provider, Translator, Flutter TTS | **Impact:** Complete language learning companion

My Portfolio ([My Portfolio](#))– Built responsive Flutter web app showcasing projects with custom animations

EDUCATION

Damanhour University | *B.Sc. Computer Science & Mathematics*

09/2022 - Present

- Current GPA: **3.27** / 4.0

LANGUAGES

- **Arabic** (*Native*)
- **English** (*Professional working proficiency*)
- **French** (*Elementary proficiency*)
